Approved For Release 2001/04/23 : CIA-RDP66R00638R000100100275-8

Endorsement to
Memorandum of Understanding
regarding
Chemical Processing and Reproduction of Photography
from (TS) NRP Missions

Concur, with the following clarifying remarks:

a. That the operational control discussed in Paragraph 4 is intended to be limited to those functions quoted in Paragraph 8 since it is believed that other management responsibility for the respective facilities should be vested in CIA and Director of Special Projects, OSAF.

b. Paragraph 5 should not be understood to eliminate processing of original negative material at certain overseas locations, such as [redacted] where tactical usage demands rapid processing. Likewise, it is deemed desirable that the duplicate positive and negative material furnished NPIC for rapid community exploitation should be processed at Eastman. It is agreed AFSPPL should quite appropriately produce the major portion of duplicate material required.
